

Alex Star – Red

A professional Asclepion alexandrite laser system for hair removal, featuring a touchscreen control panel and dual SENSE-cooled handpieces for clinic-based treatments.

The AlexStar Red Edition is a professional alexandrite laser hair-removal system by Asclepion Laser Technologies, designed for clinic-based hair-removal treatments. It features a touchscreen control panel for adjusting treatment parameters and two SENSE-cooled handpieces for client comfort during treatment, mounted on a mobile trolley with integrated storage.

Detailed technical specifications (wavelength, spot size, maximum fluence, pulse duration range) have not been confirmed in the available product material and are deliberately left out here until Laser Aesthetics South Africa confirms the exact configuration.
