LASER HAIR REMOVAL

Specification Sheet

Cryo Sheer 808

A professional 808nm diode laser designed for permanent hair removal across a wide range of skin types, combining targeted energy delivery with sapphire cooling for a comfortable treatment experience.

The 808nm Diode Laser remains a leading technology for long-term hair reduction, offering fast, comfortable treatments for the face, neck, underarms, legs, back, chest and bikini/intimate areas. Designed for Fitzpatrick Skin Types I–VI, the advanced sapphire cooling system helps protect the skin and enhance ensuring a Pain free treatment.
