LASER HAIR REMOVAL

Specification Sheet

Cryo Sheer Aqua

Advanced triple-wavelength diode technology combining 755nm Alexandrite, 808nm Diode and 1064nm Nd:YAG in one handpiece for versatile hair removal across Skin Types 1–6, supported by advanced sapphire cooling.

Experience advanced hair removal technology with the Cryo Sheer, combining three powerful wavelengths — 755 nm, 808 nm and 1064 nm — to target hair follicles at different depths.
Designed to focus energy on the hair follicle while minimising damage to surrounding tissue, the Cryo Sheer offers versatile treatments across multiple body areas, including the face, underarms, arms, legs, bikini line and back.
Its advanced cooling technology helps maximise client comfort during treatment, while the triple-wavelength system offers flexibility for treating a wide range of skin types when appropriate settings are selected.
One advanced system. Three powerful wavelengths. Professional laser hair removal.

SPECIFICATIONS

Brand	**Cryo Sheer**
Technology	**Triple-Wavelength Diode**
Technology	**Triple-Wavelength Diode**
Wavelengths	**755nm / 808nm / 1064nm**
755nm	**Alexandrite**
808nm	**Diode**
1064nm	**Nd:YAG**
Skin Types	**1–6**
Cooling	**Sapphire contact cooling**
Cooling Feature	**Ice Tip**
Technique	**In-motion**
Handpiece	**Triple-wavelength handpiece**
Applications	**Hair removal & skin rejuvenation**

APPLICATIONS

- Hair Removal
- Skin Rejuvenation

WARRANTY

2-year warranty, parts and labour

TRAINING

Included
