

Cryo Sheer Pro Series

The Cryo Sheer Pro Series represents a new era in laser hair removal. Featuring ultra-high-powered diode laser technology and ultra-short pulse durations, it is designed to deliver fast, precise and efficient treatments with enhanced coverage.

Powered by AI, the system integrates a dedicated scanner and intelligent skin and hair analysis to support more accurate, personalised treatment protocols.

Advanced technology. Intelligent precision. Exceptional performance.
The high-performance multi wavelength diode technology is characterized by efficiency and versatility. Available in single or dual handles allowing fast coverage over both small & larger areas. 3 or 4 wavelengths in one sophisticated handle, simultaneously targeting the main focal points as well as anatomical structures within the hair follicle. The lasers have been designed for face and body hair removal but can also be used for skin rejuvenation.

SPECIFICATIONS

Brand	
Technology	Laser Hair Removal

APPLICATIONS

- Hair Removal
- Skin Rejuvenation
