

EvoLINE 1

A versatile professional laser platform combining Alexandrite and Nd:YAG technology to deliver year-round hair removal alongside a broader range of aesthetic treatments.

Treats: permanent hair removal, vascular lesions, pigmented lesions, skin rejuvenation, acne treatment and prevention, onychomycosis and haemangiomas. Laser Aesthetics SA lists the EvoLINE platform as combining Nd:YAG and Alexandrite and gives applications including unwanted hair, vascular lesions, pigmented lesions, skin rejuvenation, acne, onychomycosis and haemangiomas. These technical specifications come from the current EvoLINE manufacturer documentation rather than the short Laser Aesthetics SA listing.

SPECIFICATIONS
