

EvoLINE 3

A professional 1064nm Nd:YAG laser platform designed for versatile hair removal and aesthetic applications, with deeper energy penetration suited to darker skin types.

Treats: permanent hair removal, vascular lesions, spider veins, haemangiomas, skin rejuvenation, acne treatment and prevention, and onychomycosis. Laser Aesthetics SA identifies EvoLINE 3 as the Nd:YAG configuration, while the EvoLINE platform documentation describes the 1064nm wavelength as the deeper-reaching option for darker skin types and vascular applications.

SPECIFICATIONS

Brand	
Technology	Nd:YAG
Technology	Nd:YAG
Wavelength	1064nm
Spot Size	2–24mm
