

Skin-matology Pro Peptide Microneedling Kit

A professional treatment kit for a complete course of peptide-focused microneedling treatments.

A professional treatment kit designed for aesthetic therapists to perform a complete course of peptide-focused microneedling treatments. Formulated to support skin renewal, hydration and a smoother, more refined appearance, this kit combines a peptide glide serum, cooling peptide gel and post-treatment peptide masks. Key peptides: Argireline and Matrixyl 3000. One kit provides sufficient product for up to 10 professional microneedling treatments, depending on treatment protocol and product usage. For professional aesthetic use only.
