

Skin-matology AzelaClear 10% Serum

A targeted 10% Azelaic Acid serum to support clearer, calmer and more even-looking skin — suitable for blemish- and redness-prone skin.

A targeted 10% Azelaic Acid serum formulated to support clearer, calmer and more even-looking skin. Azelaic acid is known for its anti-inflammatory and skin-soothing properties, making it suitable for blemish-prone and redness-prone skin. It also helps improve the appearance of hyperpigmentation, post-inflammatory marks and uneven skin tone. For best results, introduce gradually: use once at night for the first 5 days, allowing the skin to adjust, then morning and night as tolerated. For targeted pigmentation concerns, including melasma, can be paired with Skin-matology MelanoEase Serum; for blemish-prone skin, with the Skin-matology Niacinamide & Hyaluronic Barrier Support Serum. During the day, always follow with Skin-matology HydraShield SPF 50.
