

Skin-matology HydraShield SPF 50

A broad-spectrum SPF 50 sunscreen with a lightweight gel-cream texture for daily UVA/UVB protection.

A broad-spectrum SPF 50 sunscreen with a lightweight gel-cream texture, formulated to provide high-level daily protection against UVA and UVB radiation. COLIPA-compliant sunscreen testing and standards support reliable broad-spectrum protection, making HydraShield SPF 50 an ideal final step in your morning skincare routine. Its lightweight texture absorbs comfortably into the skin without a heavy feel. Regular daily use helps protect against UV-induced skin damage, premature visible ageing and the worsening of hyperpigmentation. Apply generously as the final step of your morning skincare routine and reapply regularly, particularly during prolonged sun exposure.
