

Dermo FX – Fractional and Microneedling RF

A professional fractional and microneedling RF system featuring a touchscreen control panel and dual RF handpieces, designed for skin-rejuvenation treatments in aesthetic clinics.

Dermo FX is a professional fractional and microneedling radiofrequency (RF) system designed for skin-rejuvenation treatments. It features a touchscreen control panel for adjusting treatment parameters and dual RF handpieces — including a fractional microneedling tip — for targeted skin-resurfacing treatments.

Detailed technical specifications (RF frequency, needle configuration, penetration depth range, energy levels) have not been confirmed in the available product material and are deliberately left out here until Laser Aesthetics South Africa confirms the exact configuration.
