

Derma Boost

A professional range of active treatment solutions designed to complement advanced aesthetic technologies and support customised skin-restoration protocols.

Depending on the specific Derma Boost formulation: skin rejuvenation, hydration, anti-ageing, pigmentation-focused treatments, acne-focused treatments, sensitive or irritated skin protocols, skin restoration, skin-brightening treatments and product infusion treatments. Derma Boost is specifically used with the Apollo Duet, where the system allows practitioners to select different Derma Boost solutions according to the client's skin condition and treatment goals.
