

Cryo Sculpt

A versatile multi-technology body contouring system combining Cryogenic Lipolysis, Ultrasound Cavitation and Radio Frequency to support targeted body shaping, fat reduction and skin tightening.

Advanced 4-in-1 Body Contouring Technology

The Cryo Sculpt combines four complementary aesthetic technologies in one versatile system, offering a comprehensive approach to non-invasive body contouring, fat-reduction treatments and skin tightening. The Cryo Sculpt combines advanced aesthetic technologies in one versatile system, designed to support non-invasive body contouring, fat-reduction treatments and skin tightening.

Featuring 5 interchangeable cryolipolysis applicators, alongside Ultrasound Cavitation and Multipolar Radiofrequency (RF), the system offers versatile treatment options for different body areas and facial applications.

Key Treatment Technologies:

- Cryolipolysis: Fat-freezing treatments targeting localised fat deposits.
- Ultrasound Cavitation: Supports body contouring and shaping.
- Multipolar RF: Supports skin tightening and facial firming.

One System. Multiple Treatments. Greater Versatility.

Cryo Sculpt helps aesthetic professionals expand their treatment offerings with a multifunctional solution for modern body and facial aesthetics.

SPECIFICATIONS

Brand	
Technology	Cryogenic Lipolysis + Cavitation + RF
Technology	Cryogenic Lipolysis + Cavitation + RF
Cryolipolysis	5 interchangeable applicators
Cavitation	40–80 kHz
RF	Tri-Polar RF
Display	10-inch touchscreen LCD
Software	Cryo Intelligent Software
Vacuum	Individually adjustable
Cooling	Preset & adjustable cooling parameters
Treatment	Body contouring & slimming
Applicators	Multiple interchangeable handles

APPLICATIONS

- Body Contouring
- Cellulite Reduction
- Skin Tightening
- Cryogenic Lipolysis
- Fat Freeze

WARRANTY

1-year warranty, parts and labour
