

ReduStim SP

A professional BioStimology® system using bioenergetic fields and five treatment straps, designed to target the thighs, abdomen and arms while supporting dynamic and static body-contouring protocols.

Treats: body contouring, slimming programmes, waist-focused treatments, abdominal contouring, thigh treatments, arm treatments, skin firmness programmes, cellulite-focused programmes, complementary lymphatic drainage protocols and pre/post cardio treatment protocols. Laser Aesthetics SA specifically describes the SP as a box connected to five straps and says it can be used in dynamic protocols alongside cardio training or static protocols alongside massage, lymphatic drainage and other targeted methods.
